Engineering/Product Leadership – Telco/Enterprise/Fintech – Certifications, and Partnerships

Professional Summary

With over 28 years of experience in technology development across telecom, fintech, and software, I bring a unique blend of hands-on technical expertise, entrepreneurial success, and leadership. As the founder of three companies—one listed on NASDAQ and two acquired—I have consistently driven innovation, to deliver market-leading solutions.

I remain deeply hands-on, from coding and architecting complex systems to building sophisticated proof-of-concept (POC) solutions that address critical business challenges. I have successfully built and led high-performing software and product teams across the US, UK, India, and Singapore, mentoring talent and fostering a culture of excellence.

Working alongside sales and business development teams, I have evangelized technologies, conducted customer workshops, and demonstrated product ROI and cost benefits, driving adoption and growth. My ability to combine technical execution with strategic vision has been key to my career success.

Employment History

Founder/CEO/CTO

January 2023 – Present

Sagebrush-Studios Tech Consulting, San Diego CA

- Lead AI-based FinTech system development, enhancing security and scalability with GCP/GKE.
- Implemented a UK energy mapping app using React, Node, and GeoJSON for seamless integration.
- Engineered a cutting-edge mapping application for UK energy sector, utilizing diverse technologies including Open Layers, Cesium, GeoJSON, React JS, Node JS, Python, and Golang.
- Drove product strategy and business growth for SDWAN/SASE company, identifying market opportunities and aligning technological capabilities with client needs.
- Orchestrated end-to-end development of micro-services architecture, ensuring optimal performance, concurrency, and seamless CI/CD/CM pipelines for enhanced product delivery.

Group CTO/CPO

August 2017 – June 2022

Bankai Group Ltd., San Diego CA

Product and engineering lead (leading 80 team members) to develop a highly scalable cloud FinTech platform (B2B2C) with a focus on AI, security, scale, and flexibility for a comprehensive mobile wallet platform with payment processing with blockchain, open banking, ISO card network protocols, tokenization, and value-added services. Technologies used – Golang, OpenAPI/Swagger, Java, Spring, Kafka, Microservices, JavaScript web and mobile technologies, SQL/No-SQL DB, Elastic, Logstash, Kibana, CI/CD/Tekton pipelines, GCP/AWS. L2 Blockchain built using Golang. Developed Elliptic Curve Cryptography in Golang. Created the product management, engineering, QA, and DevOps teams globally, managing distributed agile processes.

Founder/CEO/CTO, CIO

February 2011 – March 2017

Cataleya Inc. and Epsilon, Singapore, Mountain View CA

As the Chief Information Officer of Epsilon Global Communications, led a team of 15 infosec personnel to set the infosec standards and processes for Epsilon's global network (86 POPs and global fiber network).

As Founder/CTO/CEO of Cataleya, built the team, engineering processes (covering SDLC, agile methodologies), product, and sales for a unique next-generation all-IP security/session/application NFV platform providing a comprehensive view from network to service layers via real-time analytics, real-time fraud detection using Machine Learning algorithms.

Chief Technology Officer/VP Engineering

December 1998 – December 2010

Veraz Networks, San Diego CA, San Jose CA

As the Founder/CTO of Veraz Networks led the company to an IPO in April 2007.

Architected and developed the carrier-grade next-generation services/switching platform. Responsible for core architecture used in the session and service delivery framework, based on 3GPP IMS, GSMA IPX, TISpan, and a host of collaborative frameworks for video delivery and rich communications. Played an active role in IPO planning, road shows, and quarterly earnings calls. Set up I3 Forum, a conglomeration of global tier-1 operators, bringing focus to Digital transformation, fraud prevention, and customer experience.

Senior Software Engineer
Qualcomm Inc., San Diego CA

November 1995 – November 1998

Designed and developed the core protocols for the Qualcomm CDMA BSC/MSC product lines. The reference architecture was used by Globalstar/Loral Corp. for worldwide Satellite interconnection using geostationary LEO satellites. Worked on the IS634 initiative and software issues within the Base Station Controller.

Product and Software Architect
Link USA Corp., Cedar Rapids IA

March 1991 – October 1995

Part of the founding team and the first member of the team did a successful M&A with Global Crossing

Part of the founding team and the first member of the team did a successful M&A with Global Crossing. Architected, designed, and developed the call processing and services platform providing telecom enhanced services on a distributed system based on the HP UX system. Unique usage of SS7 signaling on a computing platform. Designed an SS7 controller card to bring SS7 signaling to a computing platform. Developed SS7 drivers to applications and with extensive B+ Tree DB with SQL. Created the first call-back system on operator queuing.

Software Research Engineer
British Telecommunications p.l.c

March 1987 – October 1990

I was part of the Network Planning Group, developing GUI based tools to plan and manage BT's domestic and International telecom networks. Developed a graphics-based tool using Motorola GKS (Graphic Kernel Support) to render BT's network graphically.

Patents, Awards, and Publications

- Best innovation award for Cataleya's AI/ML-based Orchid One platform at the Capacity Europe event
- **6 Patents on unique Call Processing concept and application of SS7 Signaling at LinkUSA Corp. (1994)**
- Patent filed for a **unique Routing Architecture** providing time & space efficiency at **Veraz Networks (2000)**
- Presented Webinars "GSMA IPX: Clearing way for new Mobile Revenues", 2007, "Media over WiMAX-Issues", 2008 and Capacity's "Mobile Backhaul Optimization", 2011, Fox Business News TV interview w/Kathy Ireland (Worldwide Business) on the evolution of tech into all-IP paradigm and the fight on fraud

Speaking Engagements

Frequent keynote presentations, panel discussions, and panel moderator at FinTech conferences such as World Finance Council, Seamless Asia, MWC Barcelona, telecom conferences such as Carrier/Capacity events, NGN Security Europe, Asian Carrier Conference – Cebu, Pacific Telecom Council, IMS Forums, Wireless Broadband Summit, GSMA IPX Event, I3 forum Workshops.

Education and Credentials

Bachelor's Degree (honors) Electrical Electronics Engineering and CS
Birla Institute of Technology and Sciences, Pilani, India
(Several graduate courses at Univ of Iowa, UCSD and USC LA)

Member of IEEE and ACM

Member GSMA (started GSMA IPX forum – 2005), I3 (founding member – 2007), and WiMAX forum
